Thesis

- Ride Sharing Mobile App

PERSONAL PROJECTS

TripShare - A Ride Sharing Mobile App

- Ride Sharing App provides a way to connect drivers with passengers having the same destination through ride-sharing in a much cheaper and faster way. Everyone will be able to call their ride with only a few clicks.
- **Technologies Used:** Flutter, Firebase, Node JS, Express, MongoDB, Google Maps API, Socket IO, Push Notification, Twilio
- **Github:** <https://github.com/zahid852/Ride-Sharing-Mobile-App>

Random - Social Media App

- Random is a real-time social media application where user can post image/videos along with with caption and place, built using Flutter with Firebase Firestore Database.
- **Technologies Used:** Flutter, Firebase, Firestore, Push Notification
- **Github:** https://github.com/zahid852/Flutter_Social_Media_App

Flutter News App

- All news with date and link to go for the detail view. Trending news, Light & Dark mode, Bookmarks, share, search
- **Technologies Used:** Flutter, Rest API
- **Github:** https://github.com/zahid852/Flutter_News_App

DoctorZone App

- This App includes Admin, Doctor and Patient login system, where admin can add disease category and their respective doctors. Patient can make an appointment, and doctor can view his appointment schedules.
- **Github:** https://github.com/zahid852/Flutter_doctor_app

Ecommerce Dashboard

- Basic Ecommerce dashboard with firebase Rest API.
- **Technologies Used:** Flutter, Firebase Rest API
- **Github:** https://github.com/zahid852/FlutterWeb_Ecommerce_dash
